

Apps that work with Google Cloud Print

The following applications allow you to print to Google Cloud Print. Those marked "Made by Google." were built and are maintained by Google. Stay tuned, we're adding more on a regular basis.

Once you've submitted a print job, use the Google Cloud Print [management page](#) to track it.

On all devices

Chrome Browser

You can print any of the open tabs on Chrome to Google Cloud Print by hitting Ctrl + P or "Print" from the wrench menu and selecting "Print with Google Cloud Print" from the destination dropdown. On the Chromebook, Cloud Print is the default print option. Made by Google.

On your Android device

Cloud Print BETA

Cloud Print is an Android application that allows you to print files off of your Android device, including emails and attachments, text messages, contacts, web pages, documents, and more.

[Cloud Print BETA on Google Play](#)

PrinterShare™ Mobile Print

Mobile Print is an Android application that supports several forms of printing, including Google Cloud Print. It can print pictures, web pages, calendar events, contacts, text messages, emails, Google Docs, and other files.

[PrinterShare\(tm\) Mobile Print on Google Play](#)

Cloud Printer

Cloud Printer is an add-on to the Mozilla Firefox mobile browser. If you use Firefox on your mobile phone, Cloud Printer allows you to print web pages as you surf.

[Cloud Printer on Firefox Mobile Add-ons](#)

Easy Print

Easy Print is an Android application that allows you to manage your printers and print jobs, and print documents and emails.

[Easy Print on Google Play](#)

Fiabee

Fiabee is a cloud sync application that allows you to print documents to Google Cloud Print from the Android app or Chrome app.

[Fiabee on Google Play](#)

[Fiabee on Chrome Web Store](#)

PrintJinni™

Wireless mobile printing app for your Email, Microsoft® Office docs, PDF files, Photos, Web pages and more. Print from Google Cloud Print to a range of Wi-Fi enabled laser printers/MFPs.

[PrintJinni on Google Play](#)

Google Cloud Print

Cloud Print is the official Android app for printing with Google Cloud Print from your Android devices. Once installed, share your documents, photos, or PDFs to the app, select your printer and preferred print options, and hit Print - that's all there is to it. Open the

app from the Android launcher to view your jobs list for recently submitted print jobs, check their current status, and select downloaded files to print.

[Cloud Print on Google Play](#)

On your iOS device

PrintCentral Pro

PrintCentral Pro is an iOS application that allows you to print to a number of services, including Google Cloud Print. PrintCentral Pro allows you to print emails and attachments, contacts, web pages, text messages, and more.

On any mobile device

Mobile Google Apps

If you access Gmail or Google Docs through your phone's browser, you can print any email, document, spreadsheet, or other Docs file through Google Cloud Print. Using the new print2docs feature, you can also "print" any file you wish to your Docs account for safe keeping. Made by Google.

From your phone, go to m.google.com

The Web

On any web page, if you see a "Print" button with the Google Cloud Print logo, you can print without leaving your browser.

KODAK Email Print

Send emails and attachments to your KODAK all-in-one printer from anywhere, using any email capable, web connected device.

Setup [KODAK Email Print](#)

On your Mac or Windows PC

Cloud Printer

Cloud Printer allows you to print from any application on your Mac (Leopard and up), through the regular Mac print menu.

[Download from Mac App Store](#)

The Web

On any web page, if you see a “Print” button with the Google Cloud Print logo, you can print without leaving your browser.

Paperless Printer

Paperless Printer® is a Windows virtual printer that allows you to print from a desktop application and have the print job sent to a remote Google cloud printer.

[Download for Windows](#)

Cloud Print for Windows

Cloud Print for Windows by Software Devices LLC registers your Windows printers as cloud printers in Google Cloud Print. Print jobs sent to those cloud printers are then automatically printed on the corresponding local printers. You can easily submit documents from your PC to any of your cloud printers.

[Download for Windows](#)

Wappwolf

Wappwolf Automator is an easy tool that helps you save a lot of time when processing files. It does this by providing powerful automations ('actions') that you can add to a folder in your favorite cloud storage service. Whenever you add one or more files to that folder, those files

will be processed automatically (e.g. printed).

Setup [Wappwolf Automator](#)

Google Cloud Printer for Windows

The Google Cloud Printer makes it easy to print to your cloud printers from any application on Windows, the same way you can from Chrome and Google Drive. Just install the printer, then print as you normally would from other applications.

[Google Cloud Print Windows Driver](#)

For enterprise and education

Google Cloud Print Connector

The Google Cloud Print Connector is a standalone version of the connector baked into Chrome - it connects your legacy printers to Google Cloud Print so that users can reach them from anywhere. Unlike the Chrome connector, the standalone version runs as a Windows service to make it more manageable and resilient for enterprise and school environments.

[Google Cloud Print Connector](#)

uniFLOW

uniFLOW is an enterprise secure print and scan management system allowing organizations to control and manage the printing process. uniFLOW provides accounting, budget control, job routing and secure printing functionality for any printer, allowing users to submit jobs via Google Cloud Print, Windows and Mac clients, email or mobile devices.

[Learn more about uniFLOW](#)

Presto

Presto is an enterprise print server that registers your PC's printers with Google and makes the printers available to Android phones and tablets, Chromebooks, or any Google Cloud Print enabled device.

[Learn more about Presto](#)

GreenTools for Google Apps

GreenTools for Google Apps (G4G) from BVSTools, Inc. is the first tool set integrating IBM i (System i, iSeries, AS/400) and Google Apps APIs such as Google Cloud Print and Google Calendar.

[Learn more about GreenTools](#)

Ultradox for Google Apps

Ultradox is a web application that generates and prints PDF documents using Google Cloud Print. You can merge data from contacts, spreadsheets or your own application into Google Docs to send and print invoices, contracts, address labels and more right from the cloud - even when you are offline.

[Learn more about Ultradox](#)

PaperCut

PaperCut tracks and controls print jobs from any device supporting Google's Cloud Print. All your PaperCut managed printers become GCP enabled and user's accounts mapped using Google identities.
